

Hydro-Seeding: It Makes Beautiful Sense.

Hydro-seeding is a quick, proven and affordable way to establish a thick luxurios new lawn.

Here are just some of the advantages:

- **It's economical**, costing less than 50 percent of sod lawn
- **It's faster and easier.** We spray-apply a nutrient-rich mix of seeds and specially processed wood fibers that provide an ideal micro-environment for vigorous growth.
- **You'll get a thicker, more uniform lawn**—the result of a mat of interlocking fibers creating a micro-green house effect.
- **Your lawn will be healthier and last longer** because it's grown right at your home—not at a distant turf farm
- **A single application** by trained professionals yields superior results the first time.
- **Hydro-seeding is safe and non-toxic** to kids, pets and the environment

Get your new lawn off to a healthy start with hydro-seeding! Call us today for more information and a free price quote.
